

Tom Stoyka gave me my first ride in an Aircoupe, I had always liked the look of the 'Coupe and Tom's plane handled very well so I started looking for one to purchase. I found my Forney F1 Aircoupe, C-GUQP, in an issue of Trade-A-Plane in June of 2002. It was located nearby at the Morden Airport so I went out to have a look. It has proven to be a great little plane for a Weekend Warrior out hunting for \$100 hamburgers but not so comfortable for big pilots like me who have consumed too many of those very substantial hamburgers. Most of my flights have been solo due to size restraints but this little plane has given me many fine flying hours over the years.
